

SUNFLO

The Tough P-1500

Solve Your High-Pressure Pumping Problems

The Sunflo P-1500 is one tough pump that will stand up to your most demanding high-pressure, medium-duty requirements. For chemical, paper, and general industry to non-API hydrocarbon processing services, this pump is built strong to stay on the job. With the P-1500 Model, you get all the features that you've come to rely on from Sunflo -- design simplicity, compact size, low-cost maintenance, and quick in-place repair. Now, in addition, you get the highest level of reliability from our toughest pump ever.

Applications

Chemical

- Reactor Injection
- Seal Flush
- Catalyst Injection

Hydrocarbon

- Condensate Return
- Knock-out Drum
- Caustic Injection

Pump & Paper

- Trim Squirt
- Pulp Seal Flush
- Condensate Return

Reverse Osmosis

Boiler Feed

General Industry

Features & Benefits

- New rugged four-bolt case withstands pipe strain
- New reverse-pressure gearbox seal handles process upsets
- Larger bearing and seal design offers long-term reliability
- Centrifugal design provides pulsation-free performance
- Removable shaft assembly allows easy, in-place maintenance

Specifications

Type	Single Impeller Centrifugal	Maximum Power	10 hp [7.5 kW]
Configuration	Frame Mount or Close Coupled	Materials of Construction	316SS, Duplex SS Optional
Maximum Capacity	33 GPM [7.5 m ³ /hr]	Connections	NPT or 300# Flanges
Maximum Working Pressure	1000 psi [70 kg/cm ²]	Maximum Temperature	300°F [49°C]
Maximum Suction Pressure	200 psig [14 kg/cm ²]	Delivery	2 Weeks
